

## **ACCESS REFERENCES**

Updated: May 24<sup>th</sup>, 2008

Quality Improvement in healthcare is best accomplished by improving the foundation of the system in which we operate. The principle of Access is one key element for establishing this foundation, and allowing us to re-capture the capacity to address the needs of the population. Here are a few basic references that will introduce you to these concepts.

Murray M, Tantau C. Same day appointments: Exploding the access paradigm. Family Practice Management. Sep 2000:45-50.
